Contents of Volume 21

Number 1, May 1977

OFFREY J. DUDLEY AND BRIAN C. H. STEELE. Studies of Potassium Ferrite $K_{1+x}Fe_{11}O_{17}$. III. Ionic Conductivity and Chemical Diffusion 1

A. LEVITSKII, A. HAMMOU, ET M. DUCLOT. Influence de L'Oxygène sur la Conductivité Electrique du Fluorure de Baryum Monocristallin 13

AIN DUMON, ALBERT LICHANOT, ET SIMON GROMB. Détermination des Modèles D'Imperfections de Différentes Variétés Allotropiques du sulfure cuivreux (Digénite Cubique, Chalcocite Hexagonale "Haute et Basse Température", Chalcocite Orthorhombique). 23

TAKAHASHI, O. YAMAMOTO, AND H. TAKAHASHI. Phase Diagrams of the Copper(I) Bromide–Lead Bromide and Copper(I) Iodide–Lead Iodide Systems and the Ionic Conductivity of $CuPb_3Br_7$ 37

PAJACZKOWSKA AND A. RABENAU. Phase Studies and Hydrothermal Syntheses in the System Mercury Sulfide–Manganese Sulfide 43

IGUCHI AND R. J. D. TILLEY. The Electrostatic Interaction Energy between Crystallographic Shear Planes in Reduced Tungsten Trioxide 49

DEPMEIER, J. FELSCHE, AND G. WILDERMUTH. Phases and Phase Transitions of Compounds $(C_nH_{2n+1}NH_3)_2MnCl_4$ with $n = 1, 2, 3$ 57

A. DE ANGELIS AND M. SCHIAVELLO. X-Ray Photoelectron Spectroscopy Study of Nonstoichiometric Tungsten Oxides 67

Number 2, June 1977

KEHIKO TAKAHASHI, NOBORU WAKABAYASHI, AND OSAMU YAMAMOTO. Solid-State Ionics: The Electrical Conductivity in the $Ag_{1-x}Cu_xI$-Substituted Ammonium Iodide Double Salts 73

T. HOGGINS, L. E. RENDON-DIAZMIRON, AND H. STEINFINK. Crystal Structure, Mössbauer, and Magnetic Behavior of Mixed Valence Compounds in the Ba–Fe–S System: $Ba_3(Ba_{1-x}Al_x)Fe_2S_6[S_{1-y}(S_2)_y]$ 79

THUR T. HOWE AND TOSHIHIDE TSUJI. The Fe–Se System. III. Mössbauer Diffusional Line-Broadening Studies of Iron Selenide of Composition $Fe_{0.96}Se$ 91

BLASSE, G. P. M. VAN DEN HEUVEL, AND J. J. A. VAN HESTEREN. The Luminescence of Uranium-Activated Yttrium Tungstate (Y_2WO_6) 99

WEBER AND TED B. FLANAGAN. The Conductivity of Single Crystals of 9-Methyladenine 105

MULAK. Crystal Field Parameters in $USiO_4$ from Temperature Dependence of Paramagnetic Susceptibility 117

J. G. BERGMAN, G. R. CRANE, AND E. H. TURNER. The Tetragonal Deformation of the TiO_6 Octahedron in Ferroelectric $PbTiO_3$ 1

R. J. BOUCHARD, J. F. WEIHER, AND J. L. GILLSON. $LaRu_xFe_{1-x}O_3$ Perovskites 1

CATHERINE E. RICE AND WILLIAM R. ROBINSON. Structural Changes in the Solid Solution $(Ti_{1-x}V_x)_2O_3$ as x Varies from Zero to One 1

CATHERINE E. RICE AND WILLIAM R. ROBINSON. Structural Changes Resulting from Doping Ti_2O_3 with Sc_2O_3 or Al_2O_3 1

F. BESREST ET G. COLLIN. Structure de $La_2Fe_2S_5$ et de $La_2Fe_{1.87}S_5$ 1

Number 3, July 1977

M. SHARON AND ANJAN K. KALIA. Electrical Conduction and Diffusion Studies in $NH_4H_2PO_4$ and KH_2PO_4 Single Crystals 1

R. L. AMMLUNG, D. F. SHRIVER, M. KAMIMOTO, AND D. H. WHITMORE. Conductivity and Raman Spectroscopy of New Indium(I) and Thallium(I) Ionic Conductors. In_4CdI_6, In_2ZnI_4, and Tl_2ZnI_4, and the Related Compound Tl_4CdI_6 1

J. J. RAFALKO, B. I. SWANSON, AND G. W. BEALL. Lattice Instabilities in $Cs_2MFe(CN)_6$ ($M = Mg^{2+}$, Ca^{2+}, and Sr^{2+}): The Crystal Structure of $Cs_2BaFe(CN)_6 \cdot 2H_2O$ 1

JACQUES TREHOUX, FRANCIS ABRAHAM, ET DANIEL THOMAS. Etude structurale d'un pyrochlore non stoechiométrique et désordonné contenant Bi(III) et Bi(V) 2

J. R. GÜNTER AND H. R. OSWALD. Crystal Structure of $Mg_2(OH)_2CO_3$, Deduced from the Topotactic Thermal Decomposition of Artinite 2

PAUL S. HARADEM, BERTRAND L. CHAMBERLAND, LEWIS KATZ, AND ALAIN GLEIZES. A Structural Model for Barium Platinum Oxide, $Ba_3Pt_2O_7$ 2

T. HIBMA AND S. GELLER. Low-Temperature Phase Transitions in $(C_5H_5NH)Ag_5I_6$ 2

A.-M. ANTHONY, J. S. ANDERSON, AND J. L. HUTCHISON. Crystallization and Ordering of Complex Oxide Structures. I. "Splat-Cooled" $Nb_2O_5-TiO_2$ 2

M. DELFINO, J. C. JACCO, P. S. GENTILE, AND D. D. BRAY. Solid-State Study of Hydrazonium Tartrate and Deuterated Hydrazonium Tartrate Enantiomers 2

A. K. CHEETHAM AND J. C. TAYLOR. Profile Analysis of Powder Neutron Diffraction Data: Its Scope, Limitations, and Applications in Solid State Chemistry 2

Number 4, August 1977

P. K. GALLAGHER, D. W. JOHNSON, JR., E. M. VOGEL, G. K. WERTHEIM, AND F. J. SCHNETTLER. Synthesis and Structure of $BaPtO_3$ 3

G. COLLIN, J. P. BOILOT, A. KAHN, J. THÉRY, AND R. COMES. Structural Investigation of K^+ and Tl^+ β-Aluminas 3

R. J. D. TILLEY. An Electron Microscope Study of Perovskite-Related Oxides in the Sr–Ti–O System 3

V. A. GUBANOV, D. E. ELLIS, AND A. A. FOTIEV. Rare-Earth Orthovanadates: Covalency, Chemical Bonding, and Optical Spectra 3

NØRLUND CHRISTENSEN, P. HANSEN, AND M. S. LEHMANN. Isotope Effects in the Bonds of α-CrOOH and α-CrOOD. 325

AN Y. Y. CHAN AND SEYMOUR GELLER. Crystal Structure and Conductivity of 26-Silver 18-Iodide Tetratungstate, $Ag_{26}I_{18}W_4O_{16}$ 331

NTOINE, D. VIVIEN, J. THÉRY, R. COLLONGUES, AND J. LIVAGE. EPR Study of Gd^{3+} Ions in β-Alumina Single Crystals. 349

ALON, J. C. GACON, A. VEDRINE, ET G. BOULON. Analyse des sites de KLu_3F_{10} et $BaCaLu_2F_{10}$ par spectroscopie de l'ion Eu^{3+} 357

ULLIGER, R. SCHMELCZER, AND D. SCHWARZENBACH. The GdPS Structure, a New PbFCl-Type Derivative. 371

GILLOT, F. BOUTON, J. F. FERRIOT, F. CHASSAGNEUX, AND A. ROUSSET. Infrared Investigation of Aluminum- and Chromium-Substituted Magnetites and of the Lacunar Spinels Resulting from their Oxidation 375

IAN DZIEMBAJ AND JACEK PIWOWARCZYK. Oxygen Equilibrium Pressure above the V_2O_{5-x} Oxide System at 600°C ($x < 0.43$) 387

THOR INDEX FOR VOLUME 21 393

The Subject Index for Volume 21 will appear in the December 1977 issue as part of a cumulative index for the year 1977.

Information for Authors

he *Journal of Solid State Chemistry* is a research journal devoted to the chemical, structural, thermodynamic, tronic, magnetic, and optical properties and processes of solids. Theoretical and experimental contributions both welcome. Critical reviews are occasionally presented in selected rapidly developing fields.

riginal papers only will be considered. Manuscripts are accepted for review with the understanding that the e work has not been and will not be published nor is presently submitted elsewhere, and that all persons d as authors have given their approval for the submission of the paper; further, that any person cited as a ce of personal communications has approved such citation. Written authorization may be required at the or's discretion. Articles and any other material published in the *Journal of Solid State Chemistry* represent pinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts may be presented as articles (i.e., conventional full-length expositions) or notes (brief rapid communications of important new work). Notes are limited to 1200 words and are given accelerated review and publication. English, French, and German are the official languages of the Journal. Contributions in Russian are acceptable, but they will be translated into English before publication. Manuscripts should be submitted to the Editor M. J. Sienko, Department of Chemistry, Cornell University, Ithaca, New York 14853), or to any member of the Editorial Advisory Board.

Manuscripts should be submitted in triplicate—double-spaced on one side of 21.5 × 28 cm paper. Headings of or sections should be typed in capital letters and centered on the page. Each page of the manuscript should be mbered. Page one should consist of the manuscript title, the author's name, and the author's affiliation. For ltiple authors, the author to whom correspondence is to be addressed should be indicated. Page two should sist of an abstract (50–150 words) suitable for use in *Chemical Abstracts*. The American Chemical Society's dbook for Authors* or the *Style Manual* of the American Institute of Physics should be followed regarding ters of style and abbreviation.

ables. Tables should be numbered with Roman numerals in a sequence corresponding to the order of citation he text. Footnotes to tables are to be placed directly below the table and should be indicated by superscript, er-case italic letters (^{a}, ^{b}, ^{c}). Tables longer than two manuscript pages should be submitted as clear, sharp sy photographs. They will be reproduced by photoengraving and should be designed to fit the Journal page r 50% reduction in each dimension. Errors in such tables cannot be corrected in proof.

uxiliary Material. In lieu of publication, unusually long tables and sequences of repetitive figures must be osited with the National Auxiliary Publications Service (NAPS). In particular, structure factor tables must eposited if, in a clear, proportional, photoreduced format, they would occupy more than one Journal page corresponds to a limit of about 1000 F_o and F_c).

or material to be deposited, a deposit fee of $15.00 for up to 98 pages of standard-size or 48 pages of oversize osited material is to be paid by the authors to NAPS. Appropriate transmittal forms to accompany the deposit- aterial are supplied to the authors by the Editor at the time a paper is accepted for publication. The following note (wherein missing numbers are to be inserted by the author in page proof) should be used to reference osited material.

ee NAPS document No. ____ for ____ pages of supplementary material. Order from ASIS/NAPS c/o Micro- e Publications, P.O. Box 3513, Grand Central Station, New York, New York 10017. Remit in advance for a NAPS Accession number. Institutions and organizations may use purchase orders when ordering, however, e is a billing charge for this service. Make checks payable to Microfiche Publications. Photocopies are $5.00. rofiche are $3.00. Outside of the U.S. and Canada, postage is $3.00 for a photocopy or $1.50 for a fiche.

igures. Figures should be submitted as glossy prints or as original black ink drawings, no larger than 21.5 × m. Press type is not acceptable. It is important that lettering on drawings be done with a lettering set and be ned to fit the proportion of the printed page. Lettering on the original should be large enough to be legible a reduction of 50%. The caption of each axis should be lettered parallel to its axis. Background grids should be included. For half-tone reproductions, glossy, high-contrast, black and white prints should be submitted. a figure should be identified on the back with the author's name and the figure number. Figures are to be cited he text by consecutive Arabic numerals. Figure captions should be typed as a list on a separate page.

Equations. Equations should be typewritten or clearly handwritten, with an Arabic number if necessary fo reference placed in parentheses to the right of equation. Reference to equations should use the form "Eq. (3)

Footnotes. Footnotes to the text should be indicated by consecutive superscript numbers and listed on a separa page at the end of the paper.

References. References should be cited in the text by consecutive underlined numbers in parentheses. TH references must appear on a separate sheet, listed in numerical order, i.e., in accordance with order of citatio in the text. After the reference number, the author's initials, last name, journal name, volume, initial page numbe and year (in parentheses) should be listed in that order. Abbreviations for journal names should follow the style *Chemical Abstracts' Service Source Index*. For book references, give the author's name, name of book (in quote Editor's name (if any), edition (if other than the first), chapter or page number, publisher's name, place and ye of publication.

Proofs. Unfolioed page proofs will be sent directly to the author from the printer together with order forms reprints. There is no page charge.
